INJECTORS

ROAD CHOICE® INJECTORS are crafted to provide an easy and accurate fit and are available for popular heavy-duty truck applications.

Each injector is completely disassembled, and components are cleaned and examined for wear and breakage. All critical, worn out or non-functioning components are replaced with new parts to help ensure reliability and performance. Each injector is then reassembled and tested for compliance to specifications for fuel delivery, injection pressure and timing.

INJECTORS

DID YOU KNOW?

To ensure proper engine performance, the new trim code provided in every C7, C13 and C15 injector box must be entered into the ECM.

The trim code eliminates any variation in injector performance due to small differences in manufacturing tolerances, friction between components and fuel flow.

For injectors used on CAT applications, you can download trim codes (C7, C13 and C15) at RoadChoice.com.
